

Dear friend,

Arkansas has seen some encouraging signs in its economic growth in recent years. We have seen technological, alternative energy, and other sectors build new plants that have created jobs for many Arkansans. However, if we are to build on that foundation, we must recognize that much work and planning is still ahead. To reach our state's full potential we must work to build consensus to meet our state's economic development, energy and environmental challenges.

As voluntary chairman, it is my goal and the goal of Progress Arkansas's membership to collectively advocate for responsible policies that will foster economic growth statewide. I invite you to join us in this important endeavor. Please contact us to learn more about how you can become a member of Progress Arkansas.

Sincerely,
